

## CASE STUDY: CAR DEALERSHIPS

### **OPPORTUNITY:**

Chain of prominent dealerships in Florida was struggling with after-hours security risks at various locations. Several instances of theft, vandalism, trespassing, and other undesired activity. Existing monitoring company proved ineffective and non-communicative. Live guards were expensive and only proved to be moderately effective.

### **TECHNICAL SITUATION:**

Existing platforms involving both IP and analog CCTV systems. Recommendations made for upgrades and improvements.

### **SOLUTION:**

Alarm response combined with proactive patrols and video-voice technology.

### **RESULTS:**

Cost-effective security solution has greatly reduced or eliminated issues at all locations. Consistent and detailed reporting on all incidents and interaction has given the client a much more comprehensive understanding of their security systems and has allowed them to greatly reduce costs associated with live guards.
